SuperSpeed Data Transfer

2.4 Amps Quick Charging

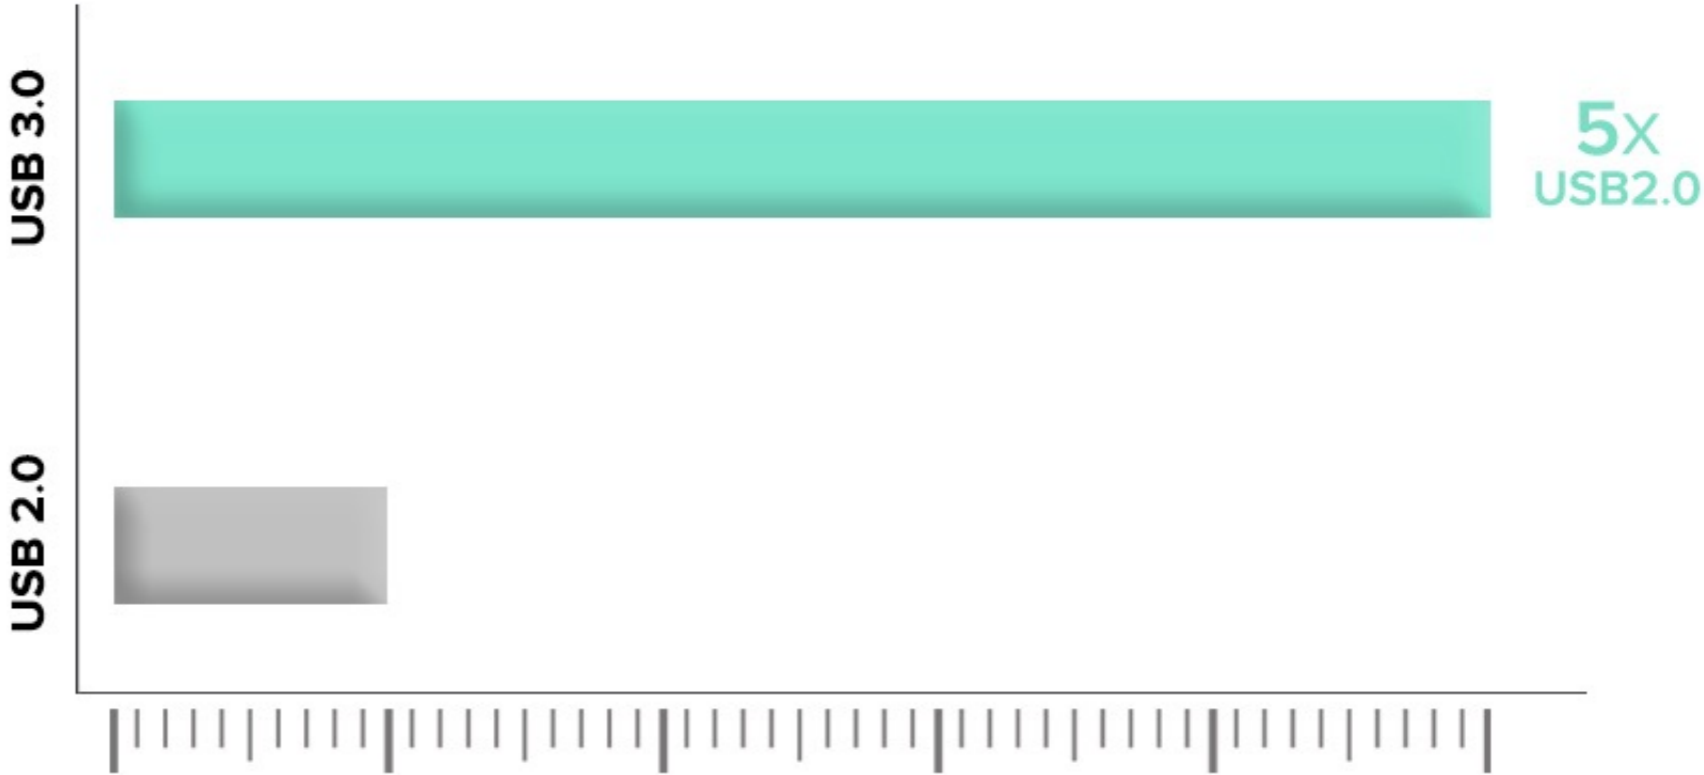

Seven is the new four. Supporting both high-speed data transfer and high-current charging, the Truffol *Seven* is the only USB hub you will need.

Your desk space is precious. The Truffol *Seven* is built with a slim unibody aluminum construction so it will never get in your way. Crafted with a finely bead-blasted surface, the *Seven* also features rubber feet to avoid slipping or scratching.

Live life in the fast lane. The *Seven* is equipped with four SuperSpeed USB 3.0* data transfer ports to serve all your syncing and backup needs.

But there's more! Each of the four ports also supplies up to 0.5A in current, making them ideal for charging small gadgets such as bluetooth earbuds, e-cigarettes, digital cameras, and others

In power, bigger is always better. The **three red ports** of the Truffol *Seven* can each supply **up to 2.4A** simultaneously, thereby covering every portable gadget including full-sized tablets, Bluetooth speakers, power banks, and smartphones.

With an advanced power management chipset, the *Seven* only charges your device at its intended current level. Consider your devices protected.
